DUAL & SINGLE CHAMBER ORIFICE FITTINGS (New or Remanufactured)

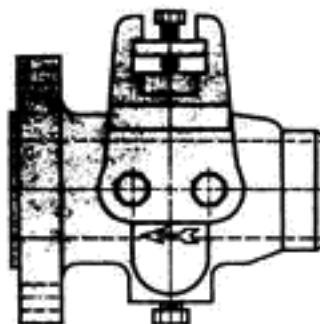

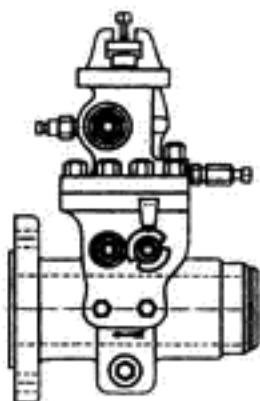

Traditional Design Excellence

TRI-FLO, a leader in the meter run fabrication, can meet the most demanding criteria and specifications for quality and accuracy oriented natural gas fabricated meter run assemblies.

DUAL & SINGLE CHAMBER fabricated meter run assemblies are manufactured from different alloys conforming to ASTM specifications as shown above. These alloys are ideally suited for fluid conditions found in orifice flow measurement

applications. Other materials are also available on request. The following service criteria should be considered in determining the correct material selection for the Orifice Meter Run Assemblies.

- Fluid to be measured
- Temperature of the fluid
- Pressure in the meter tube

CUSTOM CRAFTED
FLOW ELEMENTS
